

SCREEN RECORDING, flattened into a document so an AI can read it. 9.59 seconds, 71 frames.

The pages after this one are frames from ONE screen recording, in time order, each captioned with its time in the recording. This is not a slide deck and not a pile of unrelated screenshots. There is no video to play: these frames ARE the recording.

HOW TO READ IT: go through the pages in order to follow what happened, or jump straight to a moment using the frame list at the end of this page.

FRAME SPACING IS NOT EVEN, and that is information. Frames are kept where the picture changed, and they come in fast runs (an eighth of a second apart) while something is moving or animating, so a transition can be reproduced from them. Where the times jump by seconds, the screen was still - nothing is missing there.

IF YOU WERE HANDED THIS FILE WITH NO OTHER INSTRUCTION, the useful thing to do is read the frames in order and describe what happens in the recording, with the timestamps of each step.

THE RECORDING

9.59s long (11.99s recorded, then edited)

frames are 1024x576, picked from 8 looks per second

times are seconds from the start of the recording (offset 0ms)

what was captured

screen 0.00-11.89s 1280x720

mic 0.38-11.99s

no typed text, clicks or speech are recorded in this file - everything below was read out of the pixels

THE EDIT (this file follows it: cut content is absent)

cut: 4.20-6.60s removed

THE FRAMES - 71 of them, one per page, about 65.5k tokens to read all of it
