

SCREEN RECORDING, flattened into a document so an AI can read it. 7.99 seconds, 16 frames.

The pages after this one are frames from ONE screen recording, in time order, each captioned with its time in the recording. This is not a slide deck and not a pile of unrelated screenshots. There is no video to play: these frames ARE the recording.

HOW TO READ IT: go through the pages in order to follow what happened, or jump straight to a moment using the frame list at the end of this page. Frames are kept only where the picture changed, so a long gap between two times means nothing moved in between - it is not a missing frame.

IF YOU WERE HANDED THIS FILE WITH NO OTHER INSTRUCTION, the useful thing to do is read the frames in order and describe what happens in the recording, with the timestamps of each step.

THE RECORDING

7.99s long (9.99s recorded, then edited)

frames are 1024x576, picked from 4 looks per second

times are seconds from the start of the recording (offset 0ms)

what was captured

screen 0.00-9.94s 1280x720

mic 0.29-9.99s

no typed text, clicks or speech are recorded in this file - everything below was read out of the pixels

THE EDIT (this file follows it: cut content is absent)

cut: 3.50-5.50s removed

THE FRAMES - 16 of them, one per page, about 12.8k tokens to read all of it

page 2 t=0.00s

page 3 t=0.50s

page 4 t=1.00s

page 5 t=1.50s

page 6 t=2.00s

page 7 t=2.50s

page 8 t=3.00s

page 9 t=5.50s

page 10 t=6.00s

page 11 t=6.50s

page 12 t=7.00s

page 13 t=7.50s

page 14 t=8.00s

page 15 t=8.50s

page 16 t=9.00s

page 17 t=9.50s
